With warm, earthy tones, classic marble and hardwood floors, and jazz music setting the ambience, Dr. Mariotti strives to create a "Nordstrom experience" for each of his patients. "I want people to know that they have arrived at someplace special," he says. "I have a top-notch staff that focuses primarily on patient care and satisfaction. The entire office greets patients by their first names and ensures that all patients know and feel that they are welcome." With a good portion of his patients returning for additional services, it's evident that the practice has created a loyal patient base. "I am always honored when patients choose me as their surgeon. Patients tell me that they feel at home here, that they feel taken care of," says the easy-going plastic surgeon who believes that safety is of prime importance. "I avoid fads, but will adopt techniques that I know have safe, yet beautiful outcomes," says Dr. Mariotti.

The bulk of Dr. Mariotti's practice is cosmetic, with breast enhancement, tummy tucks and liposuction being his most frequently requested services. In addition to many "mommy makeover" procedures, his practice offers tailored treatment plans for facial rejuvenation—ranging from eyelid lifts performed under local anesthesia to complete facial rejuvenation—combining multiple procedures for more dramatic results. The ancillary nonsurgical services that he provides often complement the surgical side of his practice. These treatments include Botox®, Restylane®, Perlane® and Juvéderm™, as well as various skin-care treatments and products. Additionally, Dr. Mariotti always makes time to perform reconstructive procedures, making his practice all-encompassing. "I always welcome reconstructive patients," says Dr. Mariotti. "These patients keep me grounded and help me understand that plastic surgery is an art, as well as a science."

BEAUTY REVEALED

Uncovering a patient's inner confidence is what attracted Dr. Mariotti to the field of plastic surgery. His interest in treating **PATIENTS WHO HAVE UNDERGONE MASSIVE WEIGHT LOSS**, particularly, helps him accomplish this goal and is what he calls a "highly rewarding facet of plastic surgery." "It is one of the most gratifying aspects of what I do," says Dr. Mariotti. "Plastic surgery often represents the final step in their journey," says Dr. Mariotti of patients who have lost a significant amount of weight and want to further improve their appearance through plastic surgery. "They come to me with an improved self-esteem. My job is to make sure they look as good as they feel." Dr. Mariotti believes that his experience in **BODY CONTOURING PROCEDURES** for massive weight loss patients has made him a better plastic surgeon by increasing his ability to view things **THREE-Dimensionally**. "These procedures require you to think strategically and really understand the intricacies of skin and body relationships," he explains.
